AST5350

Petrol 1.5 TSi ACT (Belt) Engine Setting / Locking Kit – VAG

Part number	AST5350
Application	VAG 1.5 TSi ACT petrol (toothed belt)
Use	Timing belt replacement, camshaft positioning
Kit contents	• Adjustable camshaft locking tool • Crankshaft setting pin • Tensioner adjuster • Camshaft sprocket pin • Auxiliary belt tensioner pin
OEM tool equivalents	T10060A, T10340, T10499, T10504/1, VAS611007

Description

The AST5350 Petrol Engine Setting/Locking Kit is designed for toothed belt replacement on VAG 1.5 TSi ACT engines.

The OE procedure for toothed belt replacement requires an electronic camshaft alignment tool used together with VAG workshop software to retain and check the camshaft positions.

AST5350 features an adjustable camshaft locking tool designed to accurately hold the camshafts in their original position while the toothed belt is removed and replaced. The camshaft tool can also be used with the inclinometer (AST5352) to adjust the position of each camshaft should this be required.

The kit also includes the Crankshaft Setting Pin, Tensioner Adjuster, Camshaft Sprocket Pin and Auxiliary Belt Tensioner Pin required as part of the belt replacement procedure.
