Vehicle	Product: Electric fuel pump			
Mercedes-Benz	Pierburg No.	Replacement for	O.E. No.*	Ref. Nr.*
ML 230; ML 320;	7.00468.70.0	7.22336.00.0	A 163 470 28 94	0580453431
ML 350 3,7;			A 163 470 35 94	7816300
ML 430; ML 500			A 163 470 37 94	

The fuel pump which has been added to our line of products offers a cost-effective replacement solution for vehicles of the Mercedes M-Class.

The in-tank pump is supplied as a pumping unit with cable adapter and intake filter, preassembled in a holder. Through the holder, the aforementioned competitor's fuel pumps having a different diameter can be replaced. The cable adapter is simply connected to the connector on the vehicle side. In case a replacement becomes necessary, it will not be required to replace the entire pumping module.

In the case of this environment-friendly and cost-effective solution, only the pumping unit within the pumping module is replaced.

Pierburg replacement pump

Only the pumping unit in the pumping module is replaced.

The easy replacement is described in detail in the assembly instructions (enclosed with the pump).

All content including pictures and diagrams is subject to change. For assignment and replacement, refer to the current catalogues or systems based on TecAlliance.
