

Replacement of T1702N with T2013N

Pagid aims to streamline the designation of T1702N to T2013N.

This harmonization goes along with a harmonization that was also implemented in the OES.

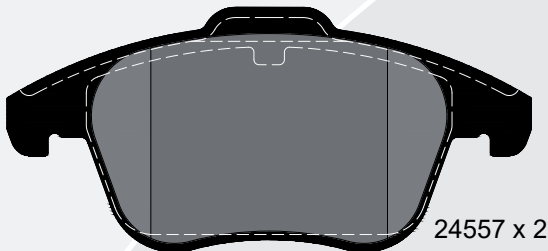

Given the identical outer dimensions of the brake pads we can ensure seamless assembly and operation.

The difference between T2013N and T1702N is the T2013N features a foil cover.

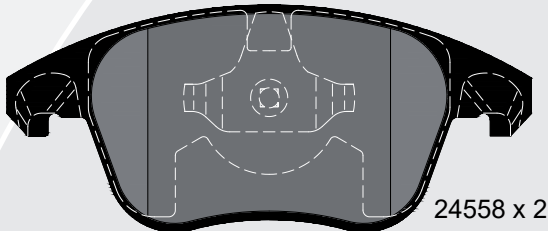

This consolidation extends coverage to a broader range of vehicles under a singular reference, namely T2013N which is already covering applications of both part numbers.
