A	Technical sheet / Datos técnicos:						A																																																																																																									
	Part number adaptable to / Referencia adaptable a					4712000080																																																																																																										
	Operating pressure / Presión de trabajo					max. 8 bar																																																																																																										
	Limitation pressure (p2) / Presión de limitación (p2)					5,2 + 0,3 bar																																																																																																										
	Permissible medium / Medio de funcionamiento					Air / Aire																																																																																																										
	Operating temperature range / Rango de temperatura					-40°C to / a +80°C																																																																																																										
B	Weight / Peso					2050 gr	B

D	<p>Purpose / Propósito: To transfer the braking demand between the tractor and trailer ensuring a coordinated braking between both vehicles. This valve reduces the supply pressure of the trailer to 5,3 bar. / Transferir la demanda de frenado entre el tractor y el remolque asegurando una frenada coordinada entre ambos vehículos. Esta válvula limita la presión de alimentación al trailer o remolque a 5,3 bar.</p> <p>Installation requirements / Requisitos para la instalación: The valve must be installed so that the exhaust port faces downwards. The valve should be mounted with at least two of four M10 mounting bolts. / La válvula debe instalarse para que el escape señale hacia abajo. La válvula debe montarse con al menos dos de los cuatro pernos de montaje M10.</p>						D
