COATED BRAKE DISCS

GERMAN OE BRAKING EXPERTISE

JURID is committed to keeping you safe, in all braking conditions. Thanks to JURID, the Aftermarket enjoys a one-stop shop solution for cutting-edge OE-quality braking technology, day after day. JURID COAT+ discs provide performance, durability and convenience too.

Coated Brake Discs

As more and more cars are being fitted with alloy wheels that have an open design, drivers are no longer looking for excellent brake performance alone. They expect their brake discs to remain clean and attractive as well.

JURID's high quality COAT+ coated discs not only deliver impeccable looks, they also provide great performance, durability and convenience too. Our coating is evenly applied over the entire disc, so there's no disc thickness variation and no corrosion on the disc surface. Plus, with no oil coating to remove, fitment is as easy as ever.

COAT+ PUTS A PLUS IN YOUR BRAKE SYSTEM

- ⊕ **Workshop friendly**, no oil coating to remove, no need for chemical cleaning agents
- ⊕ **Easy fitment** with positioning screw kit included where applicable
- ⊕ **Non-oxidising coating** which inhibits rust formation on the hub for easier replacement
- ⊕ **Optimised surface finish** for quick, smooth bedding-in of pad to disc
- ⊕ **Outstanding heat dissipation** and excellent metallurgy
- ⊕ **Vibration damping** designed to minimize brake noise and uneven pad wear
- ⊕ **Great aesthetics**, especially on open style alloy wheels
