

OE-GRADE OIL LEVEL SENSOR

OE-Matched Accuracy. Reliable Monitoring.
All-Weather Protection.

-40°C to +150°C full-range calibration

Stable signal output with accurate oil level monitoring in all temperatures

OE-matched calibration with $\leq 2\%$ signal deviation

High ECU compatibility with no fault codes or false alarms

Epoxy resin fully sealed PCB

Resists vibration, moisture, and circuit failure

OE-grade FKM / NBR sealing design

Excellent sealing with no leakage or cracking

Integrated OE 1:1 structure for direct installation

Plug-and-play fitment with no modification required
