VNTU028 - REPLACING AN ORIGINAL VERSION OF THE TURBO NEEDS ADDITIONAL PARTS

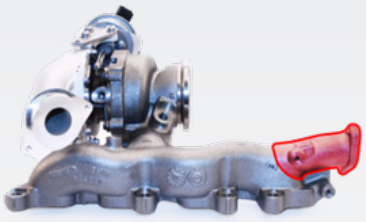

BACKGROUND

The OE turbocharger 04L 253 014 L is no longer manufactured. The new OE part 04L253014M is the replacement part, and due to the modified position of the EGR flange, some additional parts are required to secure the proper installation in the vehicle.

AVA turbo #VNTU028 is the equivalent of the OE 04L253014M part, and thus, the technician must obtain the recommended installation parts to ensure the proper replacement of the unit.

AVA VNTU28

OE: 04L253014L

RECOMMENDED SOLUTION

When installing a new turbocharger VNTU028, please take into account that additional parts will have to be ordered from vehicle manufacturer's franchised dealer, corresponding to the vehicle model:

1. **2x bolt M6x8, hex head with shoulder**
2. **1x heatshield**
3. **2x gaskets**
4. **1x connecting EGR pipe**
5. **2x screw with polygon socket M8x22**
6. **2x screw with polygon socket M8x20**
