FORD TRANSIT THERMOSTAT REPLACEMENT

COOLING

Issue Date: 23/09/26 **Issue Number:** COTB0028B

APPLICATION : Ford Transit V363 2.0 2016>2024

APPLICABLE REFERENCES : BBT566

Product Information

On the Ford Transit V363 2.0 2016>2024, Ford have changed the design of the Thermostat, replacing it with the later 08/2019 applicated Thermostat, equivalent to Borg & Beck reference BBT566.

The importance of this needs to be understood to minimise confusion and returns. The main differences are that the 05/2016>07/2019 Thermostat has three bolt fixings, one sensor and one venting valve whereas the later version from 08/2019 has one sensor, two bolt fixings and no venting valve. See below.

To clarify, this is a Ford modification and you should now fit the 08/2019> Thermostat BBT566 to all applications from 05/2016>.

Thermostat & housing with one sensor, three bolt fixings and one venting valve.
OE REF: GK2Q-9K478 / 2037317

Thermostat & housing with one sensor, two bolt fixings and no venting valve.
OE REF: KK2Q-9K478-BA / 2347347

NEW DESIGN TO BE USED ON ALL APPLICATIONS FROM 05/2016>

Please note: On applications 05/2016>07/2019, there will be a spare loom connector, which is not needed.

BBT566
