

INFORMATION

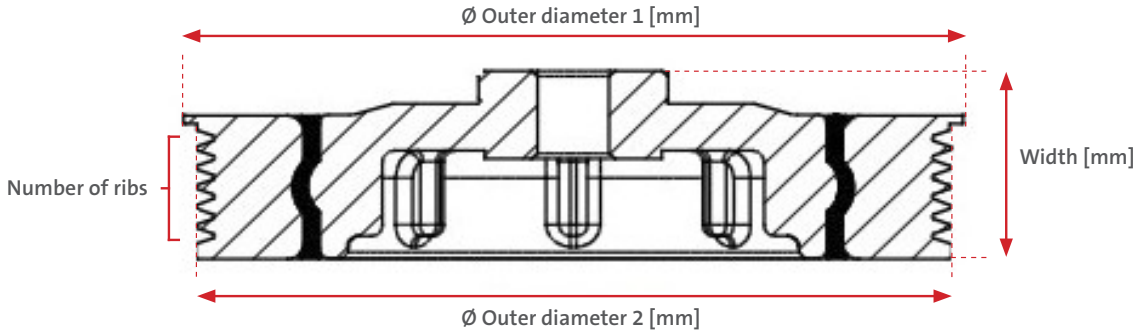

FIND THE RIGHT PULLEY

HOW TO IDENTIFY THE TORSIONAL VIBRATION DAMPER YOU NEED

The correct pulley has to be identified using the manufacturer's original part number. This number is not marked on the product itself.
To ensure the correct part is being used, the additional information provided in our online catalog should be checked.
Review the following dimensions and characteristics carefully:

- **Outer diameter 1**
- **Outer diameter 2**
- **Width**
- **Number of ribs**

IMPORTANT:

Make sure the number of ribs on the pulley matches the PK number of the belt.
Correct alignment is essential for proper performance and durability!

Example:

PK number: 5 PK

Number of ribs: 4 ribs
