

ABARTH 500C / 595C / 695C

Typ 150 (312)

Cabriolet

FIN beginnend ZFA312*, ZFABF1*

2010 - 2023

Alle Abarth-Modelle sind mit einem tiefergelegten Sportfahrwerk ausgestattet. Ab Werk sind zwei Spezifikationen verfügbar :

- schwarz lackierte Schraubenfedern mit linearer Federrate, oder
- rot lackierte Schraubenfedern mit progressiver Federrate.

Die progressiven Schraubenfedern wurden auch mit einigen der von Abarth vertriebenen Upgrade-Kits geliefert.

Die unten aufgeführten Teilenummern sind für Fahrzeuge mit oder ohne Koni FSD-Stoßdämpfer geeignet. Diese adaptiven Dämpfer sind bei einigen Modellen serienmäßig verbaut, bei anderen optional erhältlich. Je nach Modell können sie an der Vorder-, Hinter- oder beiden Achsen montiert werden.

FSD - Frequency Selective Damping.

ABARTH 500C / 595C / 695C

Type 150 (312)

Cabriolet

VIN beginning ZFA312*, ZFABF1*

2010 - 2023

All Abarth models are equipped with lowered sports suspension. Two specifications are available ex factory :

- black painted coil springs with linear spring rate, or
- red painted coil springs with progressive spring rate.

The progressive rate coil springs were also supplied with some of the upgrade kits available from Abarth.

The part numbers listed below are suitable for vehicles with or without Koni FSD shock absorbers. These adaptive dampers are installed on some models and are available as an option on others. Depending on the model, they can be mounted on the front, rear or both axles.

FSD - Frequency Selective Damping.
