

SILICONE SPRAY

DESCRIPTION

DRIVE+ Silicone Spray is a high-performance silicone-based lubricant designed for the protection and maintenance of plastic, rubber, and metal components in professional workshop environments. It forms a durable, water-repellent film that significantly reduces friction, prevents sticking, and protects rubber and plastic parts from drying, cracking, or becoming brittle.

Its anti-static properties also help reduce dust adhesion on treated surfaces.

- Excellent sliding and lubricating properties
- Protects rubber and plastic from drying and brittleness
- Reduces friction and eliminates squeaking noises
- Water-repellent, moisture-resistant, and anti-static
- Prevents freezing and sticking of rubber seals

APPLICATIONS

- Plastic rails and guides
- Door seals and sealing rubbers
- Rubber cuffs, gaskets, and hoses
- Sliding mechanisms and light-duty moving parts
- General maintenance of plastic, rubber, and metal components

INSTRUCTIONS

1. Ensure the surface to be treated is clean and dry.
2. Shake the can well before use.
3. Spray a thin, even layer from approximately 20 cm distance.
4. Spread or rub in with a soft cloth if required.
5. Wipe off any excess product to avoid over-lubrication.

PRODUCT INFORMATION

Part Number	EAN	Capacity	Quantity / carton	Languages
DWC0004A	7630744111453	400 ml	12	EN · FR · DE · IT · NL · TR · RU · DA · FI · SV · AR
DWC0004B	7630744111835	400 ml	12	EN · ES · PT · PL · RO · EL · UK · SR · BG · HU · CS · HR

TECHNICAL PROPERTIES

Colour	Colorless
Chemical basis	Silicone oil
Density at 20°C	~0.65 g/cm ³
Temperature range	-5 to 40°C
Shelf life	24 months from production date
Packaging	Aerosol spray
