THREE NEW EGR COOLER MODULES

FOR ALMOST 4 MILLION BMW VEHICLES

NEW IN OUR PRODUCT RANGE

Motorservice has expanded its product range to include three new EGR cooler modules covering a wide range of BMW models.

The new OEM quality products open up a potential market of over 3.8 million vehicles. The design of the previous EGR cooler modules has been optimised and thus tailored to the specific operating conditions.

During production, each module is subjected to extensive tests to guarantee the stringent Pierburg quality standards. EGR cooler modules combine an EGR valve, cooler and bypass flap in a single component.

NOTE

Motorservice doesn't just offer the complete module in these cases, but also the associated EGR valve as a spare part.
