

PREMIUM TRANSMISSION FILTER

Engineered for Reliable Transmission Protection

Metal housing made from high-grade automotive steel

High strength, excellent toughness, and superior crack resistance under pressure and vibration.

Plastic components made from high-performance engineering plastics

Excellent heat resistance with stable structure, preventing brittleness, whitening, or deformation.

High-efficiency filter media made from premium HV paper

Excellent filtration, dirt-holding capacity, and oil resistance for reliable valve body protection.

Sealing rings made from premium oil-resistant rubber

Excellent oil and heat resistance with strong compression recovery, preventing hardening or shrinkage over time
