

PREMIUM PCV VALVE

Delivering OE-level crankcase ventilation performance with reliable durability and stable pressure control.

PA66+GF30 valve body, FKM rubber, 304 stainless steel spring, 100% new raw materials

Heat-resistant, anti-deformation, oil-resistant, and durable for long service life and stable performance.

3D scanning data collection with dynamic flow calibration

Precise OE fitment and accurate pressure control without fault codes.

Alternating high and low temperature testing

Reliable operation in extreme cold and high-temperature environments.

Ultrasonic welded housing

Glue-free structure with strong sealing performance and no leakage.

100% leakage inspection before delivery

Stable ventilation efficiency and reduced risk of crankcase pressure issues.
