TB 13 family – changes on printing and packaging

MANN-FILTER TB 13 Air Dryer cartridges have received a fresh look. Besides standardising design and printing colour, we now offer additional information on the cartridge, e.g. a direct access to the individual catalogue page by a QR-Code and the thread size statement.

The different product lines can still be seen unchanged and at a glance via the paint colour:

- White = Basic
- Black = Standard
- Silver = Advanced
- Gold = Premium

To reduce packaging waste we offer more and more MANN-FILTER TB 13 without single cartons. The cartridge stays protected by sleeve foil, which also contains the included o-ring. The change-over to foil packaging comes in stages and can lead to a cartridge being available both in carton and foil packaging at the same time. However, the cartridge inside is the same.
