# HD ALUMINIUM PULLEY FOR POWER STEERING

for BMW

OE: 32 42 1 740 858

**Triscan SELECT: 8900 11041**

## OEM Design

## TRISCAN SELECT

## Problems

- The OEM pulley is made of injection molded plastic, which becomes brittle over time and can explode into shards at high RPM, often violently puncturing hood, radiator or fragile AC system components with high-velocity debris.

## Advantages

- Triscan SELECT offers machined aluminium pulleys, which replace failure-prone plastic OEM & aftermarket pulleys.
- The all-metal construction is precision-machined for proper balance & smooth operation, with an attractive black finish for an original look.

**Vehicle Applications**

1996–2006 BMW
