

MEYLE drive shafts and joint kits:

Same product, new colour

For the best possible protection against corrosion, MEYLE drive shafts and joint kits will henceforth be given a black powder coating. The article number will remain the same. The first coated drive shafts and joint kits are expected to be delivered from Q1/2023 onwards.

The 'Black coated' icon tells you it is the new version.

We provide support with:

- Uniform item numbers
- Communication via MEYLE channels
- Easily visible icon on the label
