Holding Clip Set, interior trim

50269130-138

To start with, our new product group "Holding Clip Set, interior trim" comprises 9 items. They include 8 OE references to which 370 vehicle applications are linked. This product group allows us to cover over 14.330.857 approvals in our European focus markets.

In order to be able to perform repairs in the area of the vehicle doors, for example, the window regulator or the cable set, the interior door panel must first be removed. It is possible that the clips on the interior door panel may break off and require replacement. Herth+Buss offers nine retaining clip sets adapted to the respective vehicle so that the interior door panel can be attached again after work has been completed.
