

Ford Transit Connect 2002-2013

HK7439, HK2185, HK2442

CLTB 0023

HK7439 1.8 Turbo Diesel TDdi 75 BHP Engines

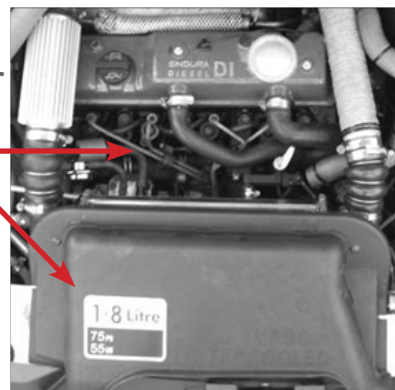

HK2185 1.8 Turbo Diesel TDCi 90 BHP Engines

HK2442 1.8 Turbo Diesel TDCi 110 BHP Engines

(Also applies to corresponding CSC Kits)

In order to select the correct clutch kit for the above vehicles, it is imperative that the correct engine is identified, as there are different clutch kits fitted to different brake horsepower engines, and in many cases, relying on VRM / registration data is not sufficient to accurately identify engine type.

Older design 1.8TDdi 75 BHP engines can be identified by engine designation / power output markings on the engine itself.

Newer design 1.8 TDCi 90/110 BHP engines do not always have specific engine designation on them, but can be identified by the later style common rail fuel injection system with electrical wiring to the fuel injectors.
