60812057, 7769902

Installation of bearings with Transport Sleeve

SKF use safe packaging solutions to protect the wheel bearing from damage during transport or mounting.

VKBA 3442 is delivered with a plastic joining sleeve, to keep the inner rings together, until the bearing is mounted on the car.

Bearing with Transport Sleeve

DO NOT PUSH OUT the plastic
sleeve manually before mounting, this will
separate the inner rings

- Always use correct mounting tools
- Apply the correct force on the inner rings
- The plastic sleeve ring will be automatically pushed out by the axle stub, when mounting the bearing with correct tools.
