

# MAXIMUM ENDURANCE OPTIMAL ENGINE COOLING

Engineered with premium materials and precision structure to deliver lasting reliability under the most demanding driving conditions.

## **Peroxide-cured Continental 6234-663-142D rubber inner tube**

Delivers OE standard durability and a premium surface finish, engineered with tighter tolerances for seamless, high-precision fitment.

## **Multi-Layer Reinforced Design**

Withstands high pressure and temperature fluctuations, ensuring reliable leak prevention and optimal flexibility.

## **Equipped with Germany-manufactured NORMA connectors**

Ensures a perfect, hassle-free fit right out of the box, saving mechanics time and reducing errors.

## **Hutchinson-Validated O-Rings**

Maintains optimal elasticity during severe thermal shocks to ensure a reliable, long-lasting seal.
