How to select the correct coil spring for your vehicle !

The table below lists all part numbers for the front suspension springs specified by Škoda for the Superb III.
The quickest and most reliable way to select the correct replacement coil spring for your vehicle is explained here.

Colour code on the spring

Original front coil springs for the Superb III carry a colour code that can be used to identify the original part number of the coil spring that was factory-installed in the vehicle. The colour code can be seen without removing the spring from the vehicle, as shown in the photograph.

Select the correct ERL reference for your vehicle using the spring table below.

Spring Seat for the Front Coil Spring

Eibach recommends replacing the lower spring seat (OE-No. 5Q0 412 545 D) where the front spring locates on the damper whenever new front coil springs are installed.
This rubber spring seat prevents metal-to-metal contact between the coil spring and the damper plate, thus extending the service life of the coil spring.
In addition, it serves to reduce noise transmission into the vehicle interior.
This spring seat is subject to wear and tear and should be inspected and replaced if damaged.
