

# HIGH-PERFORMANCE OIL FILTER HOUSING

OE-Grade Durability. Reliable Sealing.  
Efficient Filtration.

**Premium nylon and glass-fiber reinforced composite housing with no recycled materials.**

Outstanding heat resistance, strength, and dimensional stability. Prevents housing deformation, oil leakage, coolant contamination, and engine damage risks.

**High-precision molds combined with a fully automated injection molding process.**

Consistent OE-level dimensions, improved installation accuracy, uniform sealing pressure, and reduced leakage risk.

**Multi-layer synthetic fiber filter media with uniform pore structure.**

Captures particles as small as 20–25  $\mu\text{m}$  with  $\geq 99\%$  efficiency, extending engine life and filter service intervals.

**100% air-tightness testing before shipment.**

Eliminates leakage risks before installation. Ready-to-install quality with dependable sealing performance.
