

## MEYLE PD cabin air filters. Make a clean start and breathe freely!

Smog? Exhaust gas? Particulate matter? Ozone or pollen? Again and again, our health is really put to the test. Unsurprisingly, there is therefore increasing awareness among car drivers regarding health. And concerning their passengers. Fortunately, MEYLE has an answer to all of these questions: the MEYLE PD cabin air filter. Because when it comes to health, MEYLE doesn't compromise, either on quality or expertise. The very best is only just good enough. And this doesn't stop at the cabin air filter. In fact, this is where it starts.

- **Not a chance for nitrogen oxides.**

For example, with ultra-clean cabin air. High-quality filter media are enhanced with specially impregnated activated carbon.

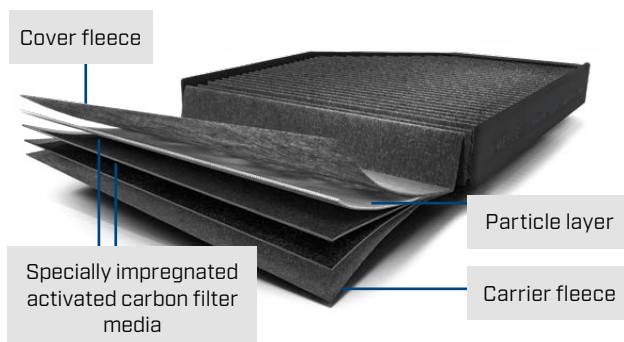

- **Unique filter power.**

Permanent NO<sub>x</sub> reductions are incidentally entirely new: only the MEYLE PD cabin air filter binds NO<sub>x</sub> as a chemical salt compound, meaning it is not released again – perfect for the environment and for the vehicle cabin.

- **Is that all? No!**

Can this be topped? Possibly only with performance design that guarantees clean airflow thanks to very

efficient particulate matter filtering combined with low pressure loss.

**MEYLE filters – the must-have with more than 1,295 product solutions that are true to the original**

To achieve everything, you have to give everything at all times. MEYLE promises top quality at all times – especially with regard to filters.

MEYLE always goes the extra mile, be it with rigorous supplier selection that includes auditing, development founded on OE sampling, or testing at MEYLE's own quality lab. It also offers very high coverage rates for the vast majority of European vehicles. **Driving is simply better with MEYLE.**
