

MEYLE-HD water pumps for a longer service life! Because we want you to be on the safe side.

Redefined quality!

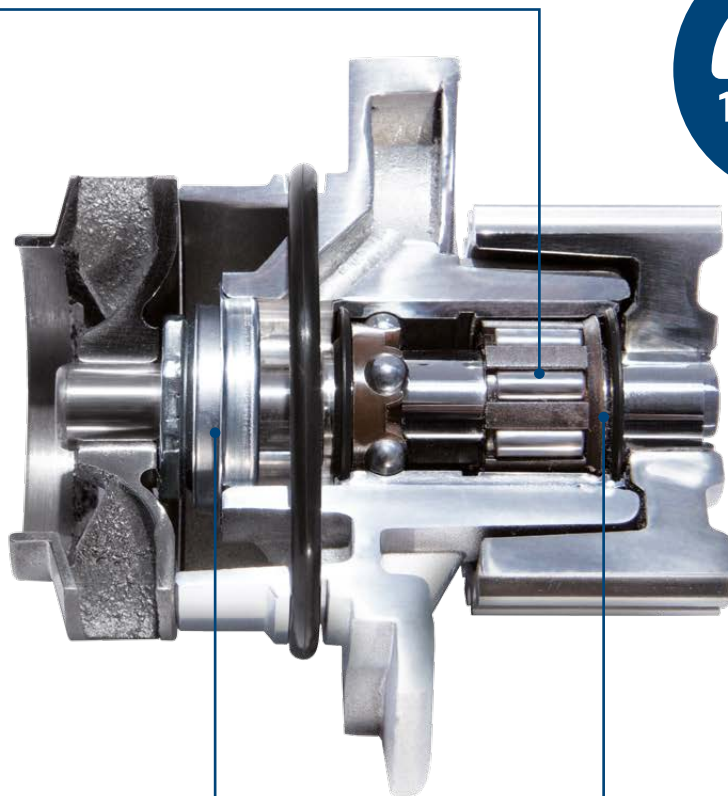

Designed with performance in mind and ideally geared to each vehicle model's individual operating environment our MEYLE-HD water pumps set the benchmark on the automotive spare parts market. Take for example the MEYLE water pump bearing:

- a) Four-point contact ball/roller bearings ensure improved distribution of excessive radial forces and optimised axial support.
- b) Angular contact ball bearings ensure support of axial moderately high radial forces and optimised axial support.

Passion for quality down to the smallest detail: MEYLE water pumps engineered to last!

Because we want you to be on the safe side.

MEYLE quality campaign: Water pumps with SiC/SiC mechanical seal. The material's superior hardness sets it apart from the quality standards typically found on the aftermarket, delivering extraordinary durability and

increased service life while minimising friction. Leading car makers also rely on this type of sealing which is fitted in MEYLE water pumps.
